Initially, the Technology platform functioned as an informal association without the formation of a legal entity; and its activities were financed by TsAGI (as the initiator of creation and one of the coordinators of the Platform). After the creation of the Association «Technology platform «Air Mobility and Aviation Technologies» from December 1, 2015, in accordance with the Charter of the Association, approved by the decision of the General Meeting of the founders of the Association – only members of the Association are full members of the Technology platform and have the following basic powers:

- participation in governing bodies;
- approval of documents regulating the activities of the Platform;
- decision-making on the formation of projects;
- free use of the services of the Association.

Organizations that joined the Technology platform before the creation of the Association and have not yet decided to join the Association are not excluded from the information (communication) interaction with the Technology platform; however, they do not have any authority to manage the activities of the Platform, including participation in general meetings of members of the Association, nominations for election to the Supervisory Board and the Management Board of the Association, participation in project work.
